FALL 1906

U.S.

ALABAMA NURSERY COMPANY

INCORPORATED

HUNTSVILLE

ALABAMA

ETHAN A. CHASE, President LEWIS CHASE, Vice-President HERBERT CHASE, Treasurer

"CHASE'S ALABAMA GROWN"

TO THE TRADE:

Since the last issue of our "RED BOOK" another nursery firm has come into existence in this district, which adds to Huntsville's importance as a nursery center; makes Huntsville a better market for nurserymen. The new firm, Chase Nursery Company, is composed of men who have been connected with this company since its organization, they know their business, you can place your orders with them knowing you are in GOOD HANDS.

All Huntsville nursery firms are distinct; all KEEN COMPETITORS; all on good terms. When customers can be served by loading a car from several nurseries, to be shipped as from one consignor, Huntsville firms will be glad to do that.

This book is to tell about OUR OWN STOCK, "CHASE'S ALABAMA GROWN"; to help find a market for our stuff only. We're not trying to sell our neighbors goods, we'll do mighty well to sell our own, but we are glad to say you can buy GOOD STOCK from our neighbors.

ALABAMA NURSERY COMPANY.

Huntsville, Ala., Sept. 1st, 1906.

REFERENCES

For the convenience of those who do not know us, we refer to any of the Banks or business houses of Huntsville, the commercial Agencies, or any of the leading nursery firms of the United States.

FALL 1906

WHOLESALE PRICE LIST

OF THE

ALABAMA NURSERY COMPANY

INCORPORATED

HUNTSVILLE, ALABAMA

We look to the nurserymen for our market and mean to confine our lists to them. If our lists go to others it is a mistake which we wish to correct, and will thank you to tell us.

PLEASE ADDRESS THE COMPANY

FOR YOUR INFORMATION

xxx

Credits: We will not accept orders until we think the buyer commercially responsible; we are glad to extend the usual terms.

Ten, Hundred and Thousand Raies: Orders for 50 trees and over (up to 300) WHEN NOT LESS THAN TEN TREES OF A VARIETY, the hundred rate will be charged. Orders for 300 trees and over WHEN NOT LESS THAN TEN TREES OF A VARIETY, the thousand rate will be charged. Orders for less than 50 trees, the Ten rate will be charged.

Prices are Subject to Market Changes.

We do not Substitute, unless instructed to do so, AND THEN LABEL TRUE TO NAME.

Each Order is Handled Separately. After lifting, the trees are sent to our packing house, where they are graded and bunched; no exposure. Customers may depend on fresh, sound, perfect stock.

Telegraphic Orders usually filled same day they are received. Use Nurseryman's Telegraphic Code.

Guarantee of Genuineness. We exercise the greatest care to keep our varieties PURE and TRUE to name, and hold ourselves in readiness at all time to replace, on proper proof, all stock that may prove otherwise, or refund the amount paid; but it is mutually agreed between the purchaser and ourselves, that we shall not be liable for any amount greater than the original price of the goods.

Packing

Our packing season begins October 1st, and continues through the Winter until March 1st.

Shipping

Please state how goods must be sent; whether by freight or express; also route. If no directions are given, we will ship as we think best serves customer's interests without assuming responsibility. THE RISK AND COST OF TRANSPORTATION BELONG TO PURCHASER.

Grades

We grade carefully; in some cases by caliper, others by height. When by both, the caliper must govern. The lower number is included, and the higher number excluded. For instance, in a grade from four to five feet, four feet trees are included, but five feet go into the next grade. If plump five feet trees are wanted, the order must be for five to six feet. When possible, we prefer to send samples to prospective customers.

Caution

We accept all orders upon the condition that they shall be void should any injury befall the stock from frost, hail, storm, fire or other causes over which we have no control.

Claims

Must be made immediately on receipt of goods.

Mistakes

Yes, we make them, not always; when made we wish to correct them. We try to avoid mistakes; rarely make the same one a second time. Thus, mistakes do us good; they improve our service. We are afraid of the man who "never makes mistakes."

PETIME—If possible, give a few days notice before you want stock shipped. We will ship your goods on the day specified if possible.

CIPHER—For convenience in Telegraphing, a Cipher word in *Italic* type is given for each grade.

Spring of 1905 we lined out an assortment of shrubs for plantings to be made next Fall from a plan of our grounds by Mr. Alling S. DeForest, Landscape Architect, Rochester, N. Y. To be sure of our supply we planted a surplus, therefore, have the following to offer:

	Each
21 Aralia Japonica, 4 to 6 feet, heavy	25 cts
75 Berberis Vulgaris, 2 to 3 feet, well branched	8 cts
20 Cornus Florida, about 3 feet. bushy	20 cts
22 Cratægus Crux Galli, about 3 feet, fair only.	10 cts
28 Cydonia Japonica, about 3 feet, well branched	8 cts
20 Deutzia Gracilis, 12 to 18 inches, well branched	8 cts
20 Diospyros Virginiana, 3 to 4 feet, well branched.	10 cts
15 Evonymus Europeus, 3 to 5 feet, not well branched	8 cts
18 Evonymus Japonicus, 18 to 24 inches, well branched.	8 cts
	10 cts
	20 cts
20 Jasminum Officinale, about 3 feet, 10 to 20 branches.	20 cts
25 Laurus Tinus, 12 to 18 inches, bushy	
	10 cts
3 Sophora Japonica, about 4 feet	
50 Spirea Opufolia Aurea, 3 to 4 feet, well branched	8 cts
12 Spirea Prunifolia, about 3 feet, well branched	8 cts
53 Spirea Reevesiana, 3 to 4 feet, well branched	
27 Symphoricarpos fructo albo (racemosus) 3 to 4 feet, well bran	
20 Viburnum plicatum tomentosum, about 3 feet, well bran. fine	15 cts
43 Yucca filamentosa, fine	5 cts

PECAN—This is a picture of two pecan trees on the Mastin estate, Franklin St., Huntsville, Ala. Height of trees, 72 feet, spread of branches from the trunk, 30 feet, diameter of trunks, 36 and 39 inches. These are seedling trees; they are annual bearers. Seedling pecan trees begin bearing at ten to twelve years after planting. The nuts are apt to be of poor quality. Budded pecan trees begin bearing six to seven years after planting. The nuts are of known quantity. The budded pecans we offer, are of the best varieties.

VARIETIES AND DESCRIPTION

ARDENS-Dble purple or violet, dark red claw, (base of petal) vigorous. BOULE DE FEU-Double medium red, large flower, vigorous.

CELESTIS-Single, deep sky blue, fine heavy pistil, cardinal claw, finest blue.

DUCHESSE DE BRABANT-Very double, dark red, few petals in center fringed to white. Vigorous.

Elegantissima—Semi double, pink, inner petals quilled, red claw,

large flower, fine, vigorous.

Grandiflora Superba—Double white and red, large flower, vigorous, well formed pyramidal.

LUTEOLA PLENA—Double, dirty white, poor.
JEANNE DE ARC—Double pure white, best double white.

LADY STANLEY-Semi double, pinkish white with salmon streaks,

dark red claw, vigorous. PULCHERRIMA—Semi-double, white shaded to pink, outer petals broad and show cardinal claw, inner petals quilled, vigorous, one of the

finest in our collection. POMPON ROUGE-Double red, outer petals broad and show cardinal claw, inner petals quilled; a strong grower but not as hardy as the others.

RUBRA PLENA-Double, light red, outer petals show cardinal claw, inner petals quilled.

Totus Albus-Single, pure white, fine heavy pistil.

VIOLET CLAIR—Double violet, outer petals broad and show cardinal claw, inner petals quilled, much like Ardens. Variegated leaf.

PROMPT SHIPMENT

Knives

"Chase's Alabama Grown" Knives are especially made for us by one of the great cutlery manufacturers who has a reputation for making knives of GOOD QUALITY. The blades are hand hammered from Wardlow's English steel. For many years we have used knives from this maker and have found them satisfactory.

Budding

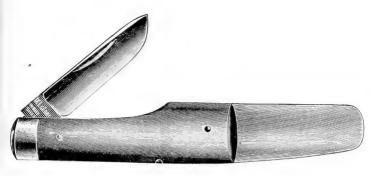

Cut ¾ Size

Pruning Shears For Making Cuttings for Propagation

We offer shears that make CLEAN CUTS because we think you want that kind.

A sharp knife makes the CLEAN-EST, BEST cut, all "soft" wood cuttings are made with a shaap knife because there is no chance for a bruise, but cuttings from hard wood can be made with shears. If the shears bruise the bark or crush the wood the cuttings have a poor chance for life. The best shears make a cut approaching a knife cut.

Price per dozen pairs, by Express or Freight _______14 50 Weight per dozen pairs, 7 lbs.

For Cutting Seedlings Back to the Bud, or Heavy Work—Same make as above. 9 inch, extra heavy.

Price per pair, postpaid____\$ 1 70 Price per dozen pairs, by Ex-

press or Freight _______ 17 00 Weight per dozen pairs, 11 lbs.

Makes a QUICK CLEAN CUT, strong enough for heavy work, we especially recommend this shear for "cutting back."

LADIES, GERMAN, 6 inch, full nickel plated. Volute spring

Not large enough for general use, a HIGH GRADE, beautifully finished shear, large 00 0 enough for use about rose bushes or shrubs in the garden, or for light work Price per dozen pairs, by Express or Freight Weight per dozen pairs, 23/4 lbs. Price per pair, postpaid...

Grafting Thread

GRAFTING THREAD put up in balls, three ply, firmly twisted and loosely wound so that it can be soaked in boiling wax and used from the ball.

Price per pound, not waxed \$\ 0 35
Same waxed ready for use, price per pound 40

This illustration shows a ball of our grafting thread with a pencial run through the hole in the center. Many nurserymen prefer to suspend the ball of grafting thread from a wire to be unwound as it is used, we prefer to keep the grafting thread in warm water while it is being used, as described below. This can be used either way.

To Keep Grafting Thread in Good Condition While Using

Put a ball of waxed grafting thread into a quart cup or pan (a tomato can will do), fill it half full of water and arrange over a lighted lamp or small oil stove to keep the water warm, go ahead.

Grafting Wax for Bench Use, and How to Wax Your Thread

One part (by weight) Tallow; two parts (by weight) pure Beeswax; four parts (by weight) Rosin. Put all in an open kettle and melt down. When boiling, stir thoroughly, throw in balls of thread loosely wound. When the balls sink to the bottom of kettle, the wax has gone through and they are ready to come out, when cool are ready for use. It will require two to four minutes for balls to sink.

Steel Box Straps

One inch wide, nine inches long, thin soft steel, strong enough to hold the heaviest box. You can drive an ordinary nail through it without punching. Packed in kegs and takes same freight rate as nails, or sixth class, ready for immediate shipment. About 2800 pieces in 100 pounds.

Less than 50 pounds, price per pound \$		
50 pound kegs, price per keg	3	OO
1000 pund kegs, price per keg	5	50

Box Lining Paper

Helps keep out frost and heat, protects contents of box from drying winds. It is water proof, by this we mean that it will resist a good deal of moisture, but there is a limit.

This paper is put up in rolls 40 inches wide, about 100 pounds in a roll. Ten lineal feet weigh one pound, or one roll will line twenty-seven full size cases. We call it a good paper. You can buy paper for less money, but we think you will find this cheaper in the end.

Price, per pound______\$ o o4½

Cordage, Twines, Etc.

FLAX SAIL TWINE for sewing burlap put up in skeins, Per pound......\$ 0 25

We cannot sell less than a reel.

Two-PLY SISAL CORD (breaking strength 170 pounds) for heavy express bales, on reels of about 45 pounds each.

Per pound______ \$ o 10
We cannot sell less than a reel.

FOUR-PLY WOOL TWINE for tying trees in bundles, 300 feet to pound, put up in balls weighing about one pound each, packed about 100 lbs. in a bale.

In bale lots, per pound \$ 0 08½
In less than bale lots, per pound 99

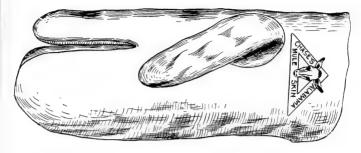

You can buy wool twine for less money per pound; the twine we offer is four-ply, strong, and 300 feet in a pound. We have tested some of the cheap twine, (thought of using it) and found 156 feet in a pound; figure it out.

Sphagnum Moss

Compressed in wire bound bales containing 80 to 100 lbs. Each bale wrapped in new burlap for 15 cents extra; the burlap prevents loss in shipment and is worth its cost for use again.

Per Ton______\$ 30 00

Alabama Mule Skin Mittens

Burlap

40 inches wide, per yard\$	О	06
Full piece, about 200 yards, per yard		0534

The price is high but we cannot sell for less on the present market. If the market "goes off" we will give you the benefit; at this price you will find new burlap as cheap, and more satisfactory than old burlap or bags.

Directions for Fumigating Nursery Stock with Hydrocyanic Acid Gas.

The necessary equipment consists of an air tight chamber (box or house) a glazed earthenware vessel, a glass measure graduated to ounces(a plain tumbler, mark the sides with a file)and a set of accurate scales. The necessary chemicals are Cyanide of Potash (98 per cent.) and Sulphuric Acid (specific gravity 1.83.) Care should be taken to gas would be generated and the fumigation prove ineffective. ("Commercial" Cyanide contentians an average of 26.45 per cent. Cyanide of Potash.) Cyanide of Potash must be kept in an air tight package and so packed will keep indefinitely, it is a deadly poison and should not be left where it will fall into the hands of children or careless persons and should never be handled by a person having open sores, cuts or bruises upon his hands. The gas is colorless and if inhaled in quantity is fatal, smaller amounts induce headache or dizziness.

The best commercial grade of Sulphuric Acid should be procured. This acid should be kept in a glass or earthenware vessel tightly stop-

ped with a glass or lead stopper.

The chief requisite for a fumigation house is that it should be air tight or gas proof.

The standard formula for fumigating each 100 cubic feet of space

contained in the fumigating house is as follows:

1 oz. Cyanide of Potash (98 per cent.) 2 fluid oz. Sulphuric Acid. 4

fluid oz. of Water

The glazed earthenware vessel should be somewhat larger than is necessary to hold the chemicals, a one or two gallon jar is perhaps the

best container.

The trees, as dug and brought from the field should be placed in the fumigating house, care being taken to see that they are free from any considerable quantities of mud or dirt, the trees should not be fumigated when they are wet as it has been shown that in this condition they are likely to be injured by the gas. When the compartment is full of stock, close all openings except the door, place the jar on the floor near the middle of the room, pour in the required amount of water and then slowly pour in the acid. The Cyanide previously weighed and enclosed in a tight paper bag is now dropped into the jar and the operator leaves immediately and closes the door tight. The steps in this operation SHOULD NEVER BE VARIED. If water is poured into the acid a violent action takes place and may be the cause of injury to the operator. Enclosing the Cyanide in a paper bag makes it convenient and safe to handle and retards the generation of the gas for a moment after being dropped, thus allowing time to leave the room and close the door securely.

Keep the room closed for forty minutes, at the end of which time the door and window should be thrown open, care being taken to avoid the outward rush of gas. After fifteen minutes of airing the room may be safely entered and the stock removed, being now ready for packing or

heeling in. After fumigation the contents of the jar should be buried. Georgia State Board of Entomology advises Nurserymen to use Merck & Co.'s Cyanide when in original sealed packages. See bulletin No. 15, pages 20-23.

Chemicals

15 pound bottle 1.40 Sulphuric Acid cannot be shipped by Express but can be shipped by Freight.

Buy chemicals of your local druggist if you can secure Merck's Cyanide in UNBROKEN original packages, and Sulphuric Acid that has been kept in a GLASS STOPPED bottle.

Last year we mentioned a tree gauge, but did not offer it because it proved a mistake. The mistake taught us, we think, how to make what is wanted. We now have in process of manufacture what should be a REAL TREE GAUGE. If it turns out as we hope, we should be able to offer it Oct. 1st.

CHASE'S TREE COUNTER: During the past two years there has been a great improvement in these counters. The levers are stronger; the machine is better in every way. We will accept old machines (regardless of condition) on account of exchange for new ones, or will sell you a new machine for money. If interested, write.

August 16th, 1906.

To Whom It May Concern:

This is to certify that Certificate No. 2 for the season of 1906-7, has this day been issued to the Alabama Nursery Company, Huntsville, Alabama.

> (Signed) R. S. MACKINTOSH, State Horticulturist.

IF WANTED we will fumigate with Hydrocyanic Acid Gas.

EXPRESS SHIPMENTS

A telegram will do the business. Shipments usually move day order is received. Use code words for grades.

Nurserymen's Telegraphic Code will be mailed on request.

Express trains leave Huntsville; for the West and South, via Memphis and Birmingham, 11:30 A. M.; 10:05 P. M.; 1:30 A. M.

For the West and North, via Nashville and St. Louis, 1:40 P. M.
